PROJECT EXPERIENCE

EXCHANGE&TRY | GitHub | Role: Creator, Developer
(Only for mobile as PWA App) The Mobile App facilitates the connection of sports enthusiasts for equipment exchange. The Backend of the App was developed using Node.js, Express, and MongoDB. The Frontend was created with TypeScript, React, and Redux Toolkit. Material UI was used for the design. For a detailed project overview and additional information, please refer to the description on GitHub.

Tasty treats | GitHub | Role: Team Lead, Developer
An application for finding culinary recipes. The project is built using Vite, HTML, CSS, JS, REST API, and various libraries. My responsibilities in the project include designing the project structure, integration of developed modules into the final product and development of the functionality for the favorites page.

Simply Chocolate | GitHub | Role: Developer
Website with adaptive and responsive layout. My role: development of the "Our Products" section. Help in solving difficult tasks.
